EDUCATION

Arizona State University, Tempe

Aug 2022 – May 2024

Master of Science in Computer Science

GPA 4.0/4.0

- Statistical Machine Learning, Data Processing at Scale, Mobile Computing, Data Mining.

Manipal Institute of Technology, India

Jul 2018 – Jul 2022

Bachelor of Technology in Information Technology

- Data Structures and Algorithms, Object Oriented Programming, Computer Networks, Operating Systems.

SKILLS

Languages: C++, Python, JavaScript, Java, SQL, Bash.

Databases: PostgreSQL, MySQL, MongoDB, AWS DynamoDB, Firebase.

Frameworks: Flask, Django, Node.js, React.js, TensorFlow, NumPy, Scikit-Learn, HTML, CSS, Bootstrap.

Technologies: AWS, Git/GitHub, Windows, Linux, Docker, Kubernetes, FastAPI, Android, Flutter.

EXPERIENCE

Cohesity

Jan 2022 – Jul 2022

Software Engineer Intern - Site Reliability Engineering

Remote

- Streamlined **efficiency by 40%** by reducing manual efforts and errors through log retrieval and summarization.
- Boosted reliability by integrating cron job health check into Cohesity Helios using **Bash and Python** scripts.
- Reduced **turnaround times by 65%** by enabling automated return authorization across all distributed nodes.

Axis Bank

May 2021 – Jul 2021

Data Science Intern - Business Intelligence Unit

Mumbai, India

- Enhanced model **accuracy by 12%** by developing a challenger to the existing credit risk machine learning model.
- Identified the ideal algorithm **XGBoost** using H2O AutoML and tuned hyperparameters using Grid Search CV.
- Achieved a **35% reduction** in model bias by ranking features using Shapley value and Permutation Importance.

ICICI Securities

Mar 2021 – May 2021

Software Developer Intern - Fixed Income Group

Mumbai, India

- Developed a desktop application for multiple time-frame analysis on NSE 500 stock data using **Python**.
- Constructed modules for calculating 5 trading indicators, **data visualization**, and designing GUI using Tkinter.

Autovista

May 2020 – Jul 2020

Full-Stack Developer Intern

Remote

- Engineered a customer relationship management (**CRM**) dashboard using **Django, React, and PostgreSQL**.
- Improved performance by **reducing lookup time by 25ms** through query optimization and indexing.
- Delivered a **40% increase in lead conversion rate** using lead scoring and working in an agile environment.

PROJECTS

Omni-Chat | C++, Node.js, JavaScript, HTML, CSS

- Pioneered a scalable chat by integrating **C++ and Node.js** servers using **WebSockets** for up to **50 users**.
- Incorporated multithreading to handle concurrent connections and translate messages, **reducing latency by 3s**.

Cloud Native Monitor App | Python, Flask, Docker, Kubernetes, AWS

- Created a real-time CPU and memory utilization percentage monitor using **Flask, Python, and HTML**.
- Implemented Docker for application containerization and orchestrated deployment on **AWS EKS** for scalability.

QR Attendance Application | Flutter, PostgreSQL, FastAPI

- Spearheaded the development of an Android application with distinct views for **5 faculty and 250+ students**.
- Formulated **REST APIs** for attendance management and generated a dynamic QR code for each class session.

ORGANIZATIONS

Open Source Contributor: Chapel-lang.

Managing Committee Member: IEEE-SBM, PyData Manipal.
